

MANUAL DISHWASHING PROCEDURE

1. All utensils and dishes shall be scraped, sorted and pre-washed under running water.
2. Wash in water between 110° and 125°F using soap or detergent.
3. Rinse all utensils and dishes by immersing them in clean, hot water to remove soap or detergent.
4. To sanitize the utensils and dishes, fill a plastic tub with warm water and add 2 caps full of bleach to the water. Allow the utensils and dishes to soak for one (1) minute. Remove the utensils and dishes from the sanitizing solution and place on rack to air-dry.
5. All utensils and dishes must be air-dried on racks.
